A UNIVERSITY ENGAGED WITH THE WORLD

THE HISTORY OF NORTHEASTERN UNIVERSITY

Northeastern University has used its leadership in experiential learning to create a vibrant new model of academic excellence. But like most great institutions of higher learning, Northeastern had modest origins.

At the end of the nineteenth century, immigrants and first-generation Americans constituted more than half of Boston's population. Chief among the city's institutions committed to helping these people improve their lives was the Boston YMCA. The YMCA became a place where young men gathered to hear lectures on literature, history, music, and other subjects considered essential to intellectual growth.

In response to the enthusiastic demand for these lectures, the directors of the YMCA organized the "Evening Institute for Young Men" in May 1896. Frank Palmer Speare, a well-known teacher and high-school principal with considerable experience in the public schools, was hired as the institute's director. Two years later, under Speare's direction, the YMCA advertised the creation of the "Department of Law of the Boston YMCA," and on October 3, 1898, Robert Gray Dodge taught the first class. The program, an immediate success, marked the birth of Northeastern University. Speare would later remark, "We started with an eraser and two sticks of chalk."

When demand for other courses grew, Speare moved to add more programs, and in 1909 the day colleges began instruction. That same year, the Evening Polytechnic School announced "cooperative engineering courses," in which students would have an opportunity to apply classroom knowledge in the workplace—the beginning of Northeastern's signature cooperative education program.

Decades of expansion

The school continued to grow and required more space. In 1922, the College of Business was founded. The university purchased the former home of the Boston Red Sox in 1929, and in 1934 the Boston architectural firm Shepley, Bulfinch, Richardson, and Abbott was awarded the contract to design Richards Hall. Using what was to become the campus signature—white brick—Shepley, Bulfinch presented plans for a neoclassical building. Opened in 1938, Richards Hall was the first building to appear on the front quadrangle.

As the campus grew, so did Northeastern's programs. In 1935, the College of Liberal Arts was added, signaling that Northeastern was on its way to becoming a major university.

When Speare stepped down as president in 1940, he was replaced by Carl Stephens Ell, dean of the College of Engineering. It was under Ell's leadership that Northeastern first admitted women to full-time day programs.

In the postwar world, Northeastern, like its sister institutions, saw a phenomenal increase in the number of people attending college. The university expanded its programs to accommodate this growing population of increasingly diverse students. In rapid succession, additional programs and colleges were established: College of Education, 1953; University College, 1960; College of Pharmacy, 1962; College of Nursing, 1964; Boston Bouvé College, 1964; College of Criminal Justice, 1967; and College of Computer Science, 1982.

This expansion of programs brought with it a need for more buildings. When Ell retired as president in 1959, he was succeeded by Asa S. Knowles, who accelerated the university's growth. Suburban properties in Weston, Nahant, and Burlington were acquired. The Boston campus blossomed with new buildings, including various undergraduate dormitories designed to accommodate the increasing number of residential students at what had been primarily a commuter campus.

Transforming the campus

When Knowles retired in 1975, he was succeeded by Kenneth G. Ryder, who had begun his career at Northeastern as a member of the history department and had risen through the ranks to become executive vice president before his election as president. Under his leadership, the university expanded and enriched its programs, particularly in the arts and humanities, and continued to improve its facilities. Plans for the Snell Library were finalized during Ryder's tenure, and the campus was beautified. During these years, Northeastern also deepened its commitment to Boston and its neighborhoods.

In 1989, Ryder stepped down as the fourth president of the university. He was succeeded by John A. Curry, Northeastern's executive vice president and its first alumnus to become president. With President Curry in charge, the university embarked on a series of ambitious undertakings, including a new science and engineering research center, a state-of-the-art classroom building, a recreation complex, and several new graduate and undergraduate programs.

To support these new ventures, Curry led Northeastern in a successful fundraising campaign. His years of leadership also featured significant restructuring as the university prepared to enter its second century. In June 1996, after four decades of service, Curry retired from Northeastern. To succeed him, the trustees elected Richard M. Freeland as the university's sixth president.

Elevating experience

A distinguished historian and administrator, President Freeland brought to the university a renewed sense of energy and mission. His programs were designed to support his vision of Northeastern as a national research university that would be student-centered, practice-oriented, and urban. Under Freeland's leadership, the university made progress toward realizing this vision. Northeastern developed the West Campus with architecturally acclaimed residence halls and research and teaching facilities for the health sciences and computer science; added new spaces to enrich student life on campus; and strengthened the university's experiential learning programs, including cooperative education, research, service learning, and study abroad.

When Freeland stepped down in 2006, he was succeeded by Joseph E. Aoun, an internationally known linguistics scholar. Northeastern's seventh president came from the University of Southern California, where he served as dean of the College of Letters, Arts, and Sciences. President Aoun has developed an academic plan outlining the university's vision in several areas: experiential learning, global outreach, use-inspired research, urban engagement, and intellectual life. He has greatly expanded global co-op opportunities. He has also aligned the university's research with three worldwide imperatives—health, security, and sustainability—with a focus on interdisciplinary solutions.

A rising global profile

Under Aoun's leadership, Northeastern started a system of regional campuses designed to be platforms for lifelong learning linked to area economies. The first two campuses opened in Charlotte, North Carolina, and Seattle. Two more campuses followed in 2015, in Silicon Valley and in Toronto. In 2016, he led the development of a new academic plan, Northeastern 2025. The plan is a blueprint for transforming the university into a global university system—featuring networks of learners and innovators—designed to empower people to succeed in this era of unprecedented technological change. Since 2016, the university has taken the first steps toward implementation by expanding the role of the regional campuses to serve as platforms for learning, research, and industry partnerships. Furthering that goal, the university in 2019 opened new locations in San Francisco and Vancouver. Northeastern also acquired a college in London, New College of the Humanities, to offer new learning and research opportunities at both institutions.

In January 2020, technology entrepreneur David Roux and his wife, Barbara, made an investment in the university to open the Roux Institute in Portland, Maine. It focuses on graduate studies and research in fields such as AI, digital engineering, and advanced life sciences, amplified by industry partnerships. The institute is designed to be a model of how higher education can jumpstart economic development in regions of the country largely bypassed by the innovation economy.

Resilience and momentum

Less than two months later, COVID-19 brought the world to a sudden, stunning halt. Campuses around the world emptied and moved online for the rest of the spring. But even as students and faculty grew accustomed to classes on Zoom, Northeastern's leaders planned for a safe fall reopening. To restart in-person learning safely, the university built a state-of-the-art COVID-19 surveillance testing facility, including a government-certified lab capable of processing more than 5,000 tests per day. It installed cutting-edge online teaching technology in classrooms that seamlessly integrated in-class and remote learners. It reimaged campus life from student clubs to residence halls to dining. And it kept the research enterprise running at its highest capacity. As a result, the university opened on schedule in September and remained open throughout the school year with no COVID-19 outbreaks. All the while, Northeastern maintained its momentum in learning, research, and innovation.

That enabled the university to follow through on its vision for the Roux Institute, which attracted a substantial investment from the Maine-based Harold Alford Foundation to support tuition scholarships, postdoctoral funding, and co-op positions with employer partners.

Building on its continued momentum, the university opened the 2021–2022 academic year with two more stellar achievements.

After more than a year of universitywide discussion and planning, the Board of Trustees approved a new academic plan, "Experience Unleashed." The plan is designed to deepen the impact of Northeastern's global network by maximizing the power of experience to understand and solve the world's interconnected, ever-evolving challenges.

To expand Northeastern's capacity to realize this ambitious vision, the university approved a merger with Mills College in Oakland, California. The partnership with Mills—a women's college with a mission focused on equity, social justice, and women's leadership—complements Northeastern's focus on inclusive experiential learning and research. And it gives the two schools a unique opportunity to create a comprehensive, bicoastal university built on global experience.

Thanks to the dedication and hard work of our university community, Frank Palmer Spere's "eraser and two sticks of chalk" have evolved into one of America's most innovative universities.

PROGRAM

Presiding

Joseph E. Aoun

President of the University

Prelude

Processional

The audience is requested to remain seated during the processional for faculty. Upon a signal from the Chief Marshal, the audience will rise and remain standing until the completion of the national anthem.

Music provided by the Northeastern University Pep Band, Allison Betsold, conductor; and Northeastern University Wind Ensemble, Allen Feinstein, conductor.

Majestic Brass

Eric Berlin, *trumpet*

Greg Spiridopoulos, *trombone*

Takatsugu Hagiwara, *tuba*

Whitacre Hill, *horn*

Steve Felix, *trumpet*

We ask those in attendance to silence their electronic devices.

UNDERGRADUATE CEREMONY

FENWAY PARK, BOSTON
FIVE O'CLOCK

The National Anthem

Anamaya Isabella Shore
College of Arts, Media and Design

The audience is requested to join in singing the first stanza.

Commencement Prayer

An Invocation by:

Saleha Ahmed Farooqui, *Muslim spiritual representative*
D'Amore-McKim School of Business

Elie Codron, *Jewish spiritual representative*
College of Social Sciences and Humanities

Lauren Le Rong Tong, *Protestant spiritual representative*
D'Amore-McKim School of Business

Robert Maclean Peterson, *Buddhist spiritual representative*
College of Engineering

Hari Vignesh Muralikrishnan, *Hindu spiritual representative*
Houry College of Computer Sciences

Lumay Elena Gomez, *Roman Catholic spiritual representative*
College of Social Sciences and Humanities

Student Oration

Adwoa Owusuaa Sefah
College of Science

Conferring of Honorary Degrees

AUTHORIZATION OF THE BOARD OF TRUSTEES

Richard A. D'Amore
Chair, Board of Trustees

INTRODUCTION OF RECIPIENTS

Degree Recipients
Freeman A. Hrabowski, III
The Honorable Donna E. Shalala
Hamdi Ulukaya

Commencement Address

Hamdi Ulukaya

Conferring of Degrees

Joseph E. Aoun
President of the University

Degrees in Course

David Madigan

Provost and Senior Vice President for Academic Affairs

College of Arts, Media and Design

Elizabeth Hudson

Dean

D'Amore-McKim School of Business

Emery Trahan

Interim Dean

Houry College of Computer Sciences

Elizabeth D. Mynatt

Dean

College of Engineering

Gregory Abowd

Dean

Commencement Rock Band

Northeastern University Pep Band

Northeastern University Wind Ensemble

Recessional

All Hail Northeastern

Northeastern Pep Band

The audience is requested to remain seated during the recessional.

HONORARY DEGREES TO BE CONFERRED

COMMENCEMENT SPEAKER

Hamdi Ulukaya

Doctor of Entrepreneurship

As founder, chair, and CEO of Chobani, Hamdi Ulukaya is a pioneer for the natural food movement and a champion for the idea that companies should focus on strengthening their communities and creating a climate of positive change in the world.

Under Ulukaya's leadership, Chobani has become the leading Greek yogurt brand in the U.S.

Beyond Chobani's mission to produce healthy food that people enjoy, Ulukaya has built his company through philanthropic initiatives that include paying off students' school lunch debts and the Chobani Scholars program.

He has extended Chobani's impact globally, founding the Chobani Food Incubator to assist socially responsible food entrepreneurs around the world and the Tent Partnership for Refugees to mobilize the business world to support refugees. Ulukaya broadened Tent's reach in 2021 by establishing the Tent Coalition for Afghan Refugees to help find employment for the tens of thousands of Afghans who fled to the U.S. last summer.

Ulukaya has been widely recognized for his refugee work and his people-first approach to business. He has been named an Eminent Advocate by the United Nations Refugee Agency, a George H.W. Bush Points of Light Award recipient, one of *TIME*'s 100 Most Influential People in the World, and a recipient of the Oslo Business for Peace Award.

His belief in the power of business to help solve global problems is an extension of his own experience as an immigrant and entrepreneur.

Raised in a dairy-farming family in a small village in eastern Turkey, Ulukaya moved to the United States in 1994 to attend college in New York.

In 2002, he opened a small wholesale feta cheese plant in Johnstown, New York, an experience he later described as "two years of the most challenging days of my life." But it gave him the confidence to broaden his business vision, purchasing a decades-old yogurt manufacturing plant in nearby New Berlin that Kraft Foods had just closed.

He reopened the plant and founded Chobani in 2005, animated by a commitment to treat the people in his newfound community as partners through worker-focused corporate policies, such as profit-sharing and generous parental leave for all of Chobani's employees.

Under Ulukaya's guidance, Chobani continues to support its communities in New York and Twin Falls, Idaho—where the company opened a second facility in 2012—partnering on programs for job training, skills-building, and childhood learning. Ulukaya also serves on the board of the Pathfinder Village Foundation in Edmeston.

Ulukaya attended Adelphi University on Long Island and holds a Master of Business Administration from the State University of New York at Albany.

Freeman A. Hrabowski, III
Doctor of Humane Letters

Freeman Hrabowski, who is retiring as the president of the University of Maryland, Baltimore County after three decades of high-achieving service, is among the nation's foremost leaders in higher education, recognized as a champion for helping more students from all backgrounds succeed in STEM fields.

He led the transformation of UMBC into a leading national university recognized for innovation and the quality of its undergraduate teaching. UMBC recently achieved Research 1, or R1, status, reflecting the strength and diversity of its research enterprise, as well as the growth of its graduate programs.

In recognition of his leadership acumen, Hrabowski has garnered numerous accolades. *TIME* named him one of America's 10 Best College Presidents in 2009, and one of the "100 Most Influential People in the World" in 2012. In 2011, he received both the TIAA-CREF Theodore M. Hesburgh Award for Leadership Excellence and the Carnegie Corporation of New York's Academic Leadership Award, two of the nation's premier awards for higher education leadership. More recently, the American Council on Education presented Hrabowski its Lifetime Achievement Award, and this year he was elected to the National Academy of Engineering in recognition of his role in developing a "national educational model for students from diverse backgrounds to excel in engineering and science."

Hrabowski's academic research and publications have focused on science and math education, with special emphasis on minority participation and performance. He was selected to chair the National Academies' committee that produced the acclaimed 2011 report, "Expanding Underrepresented Minority Participation: America's Science and Technology Talent at the Crossroads," and was subsequently appointed by President Barack Obama to chair the President's Advisory Commission on Educational Excellence for African Americans.

His commitment to these initiatives was grounded in personal experience. At age 12, he joined in the 1963 Children's Crusade march for civil rights and was arrested for his participation. In a 2015 book, *Holding Fast to Dreams: Empowering Youth from the Civil Rights Crusade to STEM Achievement*, Hrabowski describes that and other events that played a central role in his development as an educator and leader.

Hrabowski is also the co-author of *Beating the Odds* and *Overcoming the Odds*, two books focused on parenting high-achieving African American young men and women in science, as well as *The Empowered University: Shared Leadership, Culture Change, and Academic Success*, which examines how university communities support academic success.

He serves as a consultant to the National Science Foundation, the National Institutes of Health, the National Academies, and universities and school systems nationally, as well as on the boards of several leading foundations. Among his many other awards and honors, Hrabowski has been elected to the American Academy of Arts and Sciences and the American Philosophical Society and is a fellow of the American Association for the Advancement of Science.

Hrabowski joined UMBC in 1987, serving as vice provost and executive vice president before being named president of the university in 1992. Early in his tenure with the university, he teamed up with philanthropist Robert Meyerhoff to create the Meyerhoff Scholars Program to increase minority participation in STEM and advance achievement for all students in STEM fields.

He graduated from Hampton Institute with highest honors in mathematics and earned a Master of Arts in mathematics and a PhD in higher education administration/statistics from the University of Illinois at Urbana-Champaign.

The Honorable Donna E. Shalala
Doctor of Humane Letters and Public Service

Described by *The Washington Post* as “one of the most successful government managers of modern times,” Donna E. Shalala has dedicated her life to ensuring that all people in the United States have an equal shot at pursuing the American dream. As the leader of three distinguished universities, and as Secretary of Health and Human Services under President Bill Clinton, she has advocated tirelessly for better schools, civil rights, women’s rights, expanded access to healthcare, and a sustainable environment, working at the intersection of education, research, and social policy innovation.

The longest-serving Health and Human Services Secretary in U.S. history, Shalala spent eight years strengthening the nation’s health and research initiatives. She launched the Children’s Healthcare Insurance Program, which now covers more than 7.6 million children. She doubled the budget of the National Institutes of Health, expanded AIDS research, and secured the highest immunization rates in American history.

The daughter of Lebanese immigrants, she was raised in in Cleveland, Ohio. She saw education as the path to a better life. Shalala earned her bachelor’s degree from the Western College for Women and her doctorate from the Maxwell School of Citizenship and Public Affairs at Syracuse University.

After joining the faculty at Columbia University’s Teachers College, she began to make her indelible mark as a public servant.

Tapped by President Jimmy Carter, she was the assistant secretary for policy development and research at the Department of Housing and Urban Development from 1977 to 1980. There, her achievements included championing renewable energy and pressing for anti-discrimination measures.

To the realm of higher education, Shalala brought dynamic, decisive leadership. Appointed as president of Hunter College in 1980, she oversaw a dramatic increase in the percentage of female and minority faculty and administrators. Named chancellor of the University of Wisconsin-Madison in 1988, she stepped up recruitment of underrepresented minority students and faculty. As president of the University of Miami from 2001 to 2015, she raised billions of dollars for programs and scholarships while solidifying the institution’s position among top U.S. research universities.

In 2007, she interrupted her university role to support U.S. veterans as the co-chair, with Senator Bob Dole, of the President’s Commission on Care for America’s Returning Wounded Warriors. She also took a two-year leave to lead the Clinton Foundation, a platform for advancing global health and economic opportunities for women and girls.

In 2008, President George W. Bush awarded Shalala the Presidential Medal of Freedom, America’s highest civilian honor, for her “leadership and determination to ensure that all Americans can enjoy lives of hope, promise, and dignity.” That same year, the Council on Excellence in Government named her one of the greatest public servants of the past 25 years.

One of the most honored academics of her generation, she is a member of seven national academies, including the National Academy of Medicine and the American Academy of Arts and Sciences.

PRESIDENTIAL MEDALLION

Amin J. Khoury

Dr. Khoury is being recognized with Northeastern's highest honor for the lasting impact he has made on the university and the world as a business innovator, philanthropist, and inspirational university citizen.

A true son of Northeastern, Dr. Khoury earned an Executive MBA from the university in 1989 and was awarded an honorary Doctor of Entrepreneurship in 2019. He is actively engaged with the university and its students as a trustee, devoted supporter, and exemplar of the university's values.

From a challenging childhood that thrust him into the role of head of the household at age 11, Dr. Khoury made himself a transformative global entrepreneur and engaged civic leader.

Beginning as a youth with a newspaper route and a shoestring scrap metal business, and culminating with the founding and development of the global company BE Aerospace, Dr. Khoury is the quintessential business innovator. He has applied the same talent and commitment to uplifting communities through his work on behalf of the arts, education, healthcare, science, and youth activities. Dr. Khoury has served as lead director on the Synthes Board and on the boards of the Jupiter Medical Center Foundation in Florida and the Boys & Girls Club of Martin County, Florida, and as board vice chair of the Raymond F. Kravis Center for the Performing Arts in West Palm Beach, where he remains a life trustee. He has also served on the board of The Scripps Research Institute in California.

Dr. Khoury's life and work have been marked by agility of mind and a desire to keep innovating and learning.

In his late 20s, he gave up a leadership position with a manufacturing company in New York to start a new medical products and services company in Boston. In subsequent years, Dr. Khoury founded and developed companies in the scientific instrument, medical services, medical devices, and semiconductor process equipment businesses.

His success in launching new ventures was marked by an ability to identify growing niche markets where global leadership could eventually be accomplished, a quality that led to the founding of his signature business in 1987. At that time, the industry that supplied airlines with cabin interior components was highly fragmented. Dr. Khoury recognized that consolidating these products under one roof would serve the industry better. The business he founded, BE Aerospace, grew into the leading global manufacturer and supplier of aircraft cabin interior equipment. He led BE Aerospace for nearly three decades before splitting it into two separate public companies in 2014, and selling the two businesses to Rockwell Collins and the Boeing Company respectively for approximately \$14 billion. He currently serves as Partner at K.A.D., Limited Partnership, alongside his two sons.

In December 2018, he and his beloved late wife, Julie, made a game-changing gift to Northeastern, renaming the university's computer science school the Khoury College of Computer Sciences—powerful affirmation of the university's vision for experiential learning in a field driving global innovation. This was the second major donation to Northeastern from the couple, who met while both were in the MBA program. In 2003, they created the Amin J. and Julie E. Khoury Endowed Scholarship Fund at Northeastern for technological entrepreneurial studies.

Among his numerous accolades and awards, he was the inaugural recipient of Northeastern's Distinguished Entrepreneur Award in October 2017. He has also been recognized with the Ernst & Young Entrepreneur of the Year Award, and the Wright Brothers Memorial Award for Entrepreneurial Innovation in the aviation industry.

DEGREES IN COURSE

Conferral Dates

December 18, 2021

May 7, 2022

August 31, 2022

This program is for ceremonial purposes only and is not to be considered an official confirmation of degree information. It contains only those details available at the publication deadline.

Degrees are awarded from the following colleges:

College of Arts, Media and Design

D'Amore-McKim School of Business

Khoury College of Computer Sciences

College of Engineering

Bouvé College of Health Sciences

SECOND LIEUTENANTS, UNITED STATES ARMY

Cadets to be Commissioned upon Graduation

Kyle Anthony Gonzalez, *College of Engineering*

Vinh Hoang, *College of Engineering*

Jacob Matthew Landwehr, *College of Professional Studies*

Jenna Marie Majeski, *College of Social Sciences & Humanities*

Connor James Muilenburg, *College of Engineering*

Jessica Sue O'Leary, *College of Professional Studies*

Thomas John Sutter, *College of Professional Studies*

Nicholas Harris Vaughn, *College of Professional Studies*

Mary Jane Wilkerson, *Bowé College of Health Sciences*

President's ROTC Award

Mary Jane Wilkerson, *Bowé College of Health Sciences*

Distinguished Military Graduate

Jacob Matthew Landwehr, *College of Professional Studies*

Jenna Marie Majeski, *College of Social Sciences & Humanities*

Mary Jane Wilkerson, *Bowé College of Health Sciences*

Distinguished Military Student

Jacob Matthew Landwehr, *College of Professional Studies*

Jenna Marie Majeski, *College of Social Sciences & Humanities*

Thomas John Sutter, *College of Professional Studies*

Nicholas Harris Vaughn, *College of Professional Studies*

Mary Jane Wilkerson, *Bowé College of Health Sciences*

Note: To be designated a DMS (Distinguished Military Student), a cadet must possess outstanding qualities of leadership and high moral character, have exhibited a definite aptitude for and interest in military science, have attained a standing in the upper third of the ROTC class, be ranked in the upper third of the ROTC Order of Merit List, and attain an overall standing in the upper half of their university class. To be designated a DMG (Distinguished Military Graduate), a cadet must have ranked in the top 20 percent of the National Order Merit List, successfully completed the LDAC (Leader Development and Assessment Course), and graduated with a baccalaureate.

CLASS OF 2022 AWARD RECIPIENTS

Compass Award

Anisa Mansoor Amiji, *Bouvé College of Health Sciences*

Sarrah Manisha Asokumar, *D'Amore-McKim School of Business*

Lauren Renee Herfindahl, *College of Professional Studies*

Ya-Chi Christie Lee, *College of Science*

Fiona McCrae, *Houry College of Computer Sciences*

Jack Sante McKim, *D'Amore-McKim School of Business*

Nicole Occidental, *College of Science*

Taraneh Sara Tabib-Azar, *College of Arts, Media and Design*

Carrie Tam, *College of Engineering*

Richard Cardinal Cushing Award

Elie Codron, *College of Social Sciences and Humanities*

Jaeyoon Lee, *College of Social Sciences and Humanities*

Harold D. Hodgkinson Achievement Award

Hannah Marie Boyce, *College of Engineering*

PROGRAM NOTES

HISTORICAL NOTES ON ACADEMIC DRESS

Academic dress appears to have originated at the universities of Oxford and Cambridge more than 600 years ago, and, to this day, the most colorful gowns in the world are those worn at Oxford functions. European institutions show great diversity in their academic costume, since each adopted or initiated its own dress.

In contrast, American colleges and universities follow a single system of academic apparel. In 1894, a group of leading American educators met to draft guidelines on apparel. Known as the Intercollegiate Code, these guidelines were adopted the following year and amended slightly in 1932.

The distinctions set up by the Intercollegiate Code are simple. Gowns for the bachelor's degree are to be fashioned from "worsted stuff" with a yoke, pleated front, and intricate shirring across the shoulders and back. Worn closed, the bachelor's gown is distinguished primarily by its long, pointed sleeves. The master's gown has the same yoke effect and long, crescent-shaped sleeves; it may be worn open or closed.

The doctor's gown, which may also be worn open or closed, has velvet panels draped around the neck. Three horizontal velvet bars are stitched on full bell-shaped sleeves. This velvet trimming may be black or in the color that indicates the field of study to which the degree refers.

Northeastern University's distinctive doctoral gown is crimson with black velvet panels and sleeve bars. The crimson cap, or mortarboard, bears a gold metallic tassel. In accordance with academic custom, recipients of the doctor's degree, members of the university's governing boards, and government officials in the procession are entitled to wear the official regalia.

The bachelor's and master's hoods have a similar shape, while the doctor's hood has a rounded base. The length of the hood indicates the level of academic achievement, with the doctor's hood being longest; the width of the border distinguishes the degree, with the doctor's being widest. The color of the border indicates the field of study; the lining color indicates the institution conferring the degree.

At Northeastern, where only the master's and doctor's hoods are worn, a black chevron on a crimson background is used for the lining.

When colors were first assigned to signify a particular field of study, historical associations were retained as much as possible. For example, white, for arts, refers back to the white fur edging of the Oxford hood; red, for theology, to the traditional color of the church; and green, for medicine, to the color of herbs.

The tassel on the mortarboard may be black or in a color that indicates the graduate's major field of study.

The College Flags used in the Commencement ceremonies will be presented to the Commencement audience by the class marshal, the highest-ranking student in the college.

HONORS AT NORTHEASTERN

<i>Summa cum laude</i>	3.850 to 4.000
<i>Magna cum laude</i>	3.700 to 3.849
<i>Cum laude</i>	3.500 to 3.699

Gold cord worn around the neck denotes honor student.

*The registrar of the university maintains the official list and records of all graduates.
This program is for ceremonial purposes only and includes only information available at
publication deadline.*

ALMA MATER

Oh, Al - ma Ma - ter, here we throng, And
sing your prais - es strong; Your child - ren ga - ther far and near And
seek your bless - ings, dear; Fair mem - o - ries we cher - ish now And
will for - ev - er - more. Come, let us raise our voi - ces strong, North -
east - ern we a - dore.

The image shows a musical score for the hymn 'Alma Mater'. It consists of five staves of music in a single system. The key signature is three flats (B-flat, E-flat, A-flat) and the time signature is common time (C). The melody is written on a treble clef. The lyrics are printed below the notes, with hyphens indicating syllables that span across multiple notes. The score ends with a double bar line.

*Oh, Alma Mater, here we throng,
And sing your praises strong;
Your children gather far and near
And seek your blessings, dear;
Fair memories we cherish now
And will forevermore.
Come, let us raise our voices strong,
Northeastern, we adore.*
