# A UNIVERSITY ENGAGED WITH THE WORLD

## THE HISTORY OF NORTHEASTERN

Founded in 1898, Northeastern is a global research university and the recognized leader in experiential learning. Despite the university's current preeminence, Northeastern had modest origins.

At the end of the 19th century, immigrants and first-generation Americans constituted more than half of Boston's population. Chief among the city's institutions committed to helping these people improve their lives was the Boston YMCA. The YMCA became a place where young men gathered to hear lectures on literature, history, music, and other subjects considered essential to intellectual growth.

In response to the enthusiastic demand for these lectures, the directors of the YMCA organized the "Evening Institute for Young Men" in May 1896. Frank Palmer Speare, a well-known teacher and high-school principal with considerable experience in public schools, was hired as the institute's director. Two years later, under Speare's direction, the YMCA advertised the creation of the "Department of Law of the Boston YMCA," and on October 3, 1898, Robert Gray Dodge taught the first class. The program, an immediate success, marked the birth of Northeastern University. Speare would later remark, "We started with an eraser and two sticks of chalk."

When demand for other courses grew, Speare moved to add more programs, and in 1909 the full-time day colleges began instruction. That same year, the Evening Polytechnic School announced "cooperative engineering courses," in which students would have an opportunity to apply classroom knowledge in the workplace—the beginning of Northeastern's signature cooperative education program.

### **Decades of expansion**

The school continued to grow, and in 1922 the College of Business was founded. More space was needed. The university purchased the former home of the Boston Red Sox in 1929, and in 1934 the Boston architectural firm Shepley, Bulfinch, Richardson, and Abbott was awarded the contract to design Richards Hall. Using what was to become the campus signature—white brick—Shepley, Bulfinch presented plans for a neoclassical building. Opened in 1938, Richards Hall was the first building to appear on the front quadrangle.

As the campus grew, so did Northeastern's programs. In 1935, the College of Liberal Arts was added, signaling that Northeastern was on its way to becoming a major university.

When Speare stepped down as president in 1940, he was replaced by Carl Stephens Ell, dean of the College of Engineering. It was under Ell's leadership that Northeastern first admitted women to full-time day programs.

In the postwar world, Northeastern, like its peer institutions, saw a phenomenal increase in the number of people attending college. The university expanded its programs to accommodate this growing population of increasingly diverse students. In rapid succession, additional programs and colleges were established: College of Education, 1953; University

College, 1960; College of Pharmacy, 1962; College of Nursing, 1964; Boston Bouvé College, 1964; College of Criminal Justice, 1967; and College of Computer Science, 1982.

This expansion of programs brought with it a need for more buildings—and land. When Ell retired as president in 1959, he was succeeded by Asa S. Knowles. Under his leadership, suburban properties in Weston, Nahant, and Burlington were acquired and the Boston campus blossomed with new buildings, including various undergraduate dormitories designed to accommodate the increasing number of residential students at what had been primarily a commuter campus.

### **Transforming the Boston campus**

When Knowles retired in 1975, he was succeeded by Kenneth G. Ryder, who had begun his career at Northeastern as a member of the history department and had risen through the ranks to become executive vice president before his election as president. Under his leadership, the university expanded and enriched its programs, particularly in the arts and humanities, and continued to improve its facilities. Plans for the Snell Library were finalized during Ryder's tenure, and the campus was beautified. During these years, Northeastern also deepened its commitment to Boston and its neighborhoods.

In 1989, Ryder stepped down as the fourth president of the university. He was succeeded by John A. Curry, Northeastern's executive vice president and its first alumnus to become president. With President Curry in charge, the university embarked on a series of ambitious undertakings, including a new science and engineering research center, a state-of-the-art classroom building, a recreation complex, and several new graduate and undergraduate programs.

To support these new ventures, Curry led Northeastern in a successful fundraising campaign. His years of leadership also featured significant restructuring as the university prepared to enter its second century. In June 1996, after four decades of service, Curry retired from Northeastern. To succeed him, the trustees elected Richard M. Freeland as the university's sixth president.

### **Elevating experience**

A distinguished historian and administrator, President Freeland brought to the university a renewed sense of energy and mission. His programs were designed to support his vision of Northeastern as a university that would be student-centered, practice-oriented, and urban. Northeastern developed the West Campus with architecturally acclaimed residence halls and teaching facilities for the health sciences and computer science, and added new spaces to enrich student life on campus.

When Freeland stepped down in 2006, he was succeeded by Joseph E. Aoun, an internationally known linguistics scholar. Northeastern's seventh president came from the University of Southern California, where he served as dean of the College of Letters, Arts, and Sciences. President Aoun developed an academic plan outlining the university's vision in several areas: experiential learning, global outreach, use-inspired research, urban engagement, and intellectual life. He greatly expanded global co-op opportunities. He also aligned the university's research with three worldwide imperatives—health, security, and sustainability—with a focus on interdisciplinary solutions.

## **A rising global profile**

Under Aoun's leadership, Northeastern launched a system of campuses designed to be platforms for lifelong learning aligned with area economies. The first two opened in Charlotte, North Carolina (2011), and Seattle (2013). Additional campuses followed in Silicon Valley, California (2015), and in Toronto (2016).

In 2016, Aoun led the development of a new academic plan, Northeastern 2025. The plan was a blueprint for transforming the university into a global university system—featuring networks of learners and innovators—designed to empower people to succeed in this era of unprecedented technological change. Accordingly, the university expanded the role of its global campuses to serve as platforms for learning, research, and industry partnerships. In 2019, it opened another location in Vancouver and acquired New College of the Humanities in London, now officially Northeastern University London and offering undergraduates a unique opportunity to earn a dual U.S./U.K. degree. Later in 2019, Northeastern launched a research campus in Arlington, Virginia, an addition to two existing research campuses in Nahant and Burlington, Massachusetts (formed in 1967 and 2012 respectively).

Then in January 2020, technology entrepreneur David Roux and his wife, Barbara, made an investment in the university to open the Roux Institute in Portland, Maine. The institute focuses on graduate studies and research in fields such as AI, digital engineering, and advanced life sciences, amplified by industry partnerships. It was specifically designed to be a model of how higher education can ignite economic development in regions of the country largely bypassed by the innovation economy, setting a new bar for what the global university system could achieve.

## **Resilience and momentum**

The same revolutionary vision for global learning and discovery that inspired Northeastern 2025 infuses the university's latest academic plan, Experience Unleashed. The plan is designed to deepen the impact of Northeastern's global network by maximizing the power of experience to understand and solve the world's interconnected, ever-evolving challenges.

In 2022, the university took a significant step in realizing the potential for its global system by merging with Mills College in Oakland, California, becoming the first university with comprehensive residential campuses for undergraduate and graduate students on both U.S. coasts. Northeastern's Oakland campus is now home to Mills College at Northeastern and the Mills Institute, focused on equity, social justice, and women's leadership. Later in 2022, Northeastern announced its newest campus in Miami, with graduate education and innovation partnerships aligned with South Florida's economic growth.

On October 3, 2023, Northeastern marked its 125th anniversary. The milestone offered an opportunity both to recognize how the entire Northeastern community has been shaped by the power of experience and to herald the next 125 years of world-changing impact. Thanks to the dedication and hard work of our university community, Frank Palmer Spear's "eraser and two sticks of chalk" have evolved into one of the world's most innovative universities. Our faculty collaborates more fluidly with experts across industry, government, and community-based organizations. Ideas and solutions can be scaled. And our students are empowered to be true global citizens, scientists, entrepreneurs, and creators—prepared to make an impact wherever they go.

# PROGRAM

## Procession

Candidates for Master's degrees

Procession of Faculty

Procession of Platform Party led by Marshal Omar Badreldin

*Associate Teaching Professor and Associate Director, Information Systems Program, College of Engineering, Toronto Campus*

# CONVOCATION ADDRESS

*Convocation Speaker*

## **Olutoyin Oyelade**

Olutoyin Oyelade, the founding CEO of the Toronto-based investment advisory firm InVcap, is a powerful global voice on behalf of elevating Africa's economies, nurturing young entrepreneurs, and advancing the leadership aspirations of women in business.

Oyelade founded InVcap in 2013 to provide investors with high-growth opportunities in sub-Saharan Africa, centering on infrastructure projects in the commercial real estate, hospitality, consumer, and tourism sectors. As managing partner and investment committee chair, she manages the firm's private equity and funds, and oversees business development and investment strategy.

Under her direction, InVcap recently executed a multimillion-dollar deal to build SplashWorld, a waterpark in Nigeria. InVcap is also the lead investor in Entrepreneurs Point, a co-working space for startups in Toronto that offers coursework in the fundamentals of running profitable businesses through its EP Academy.

She brings more than two decades of experience in the global financial industry to her position, including 18 years in her native Nigeria. But her social enterprise and investing leadership, both for Canada and Africa, extends far beyond her corporate role.

Oyelade is the founder and CEO of the Casa Foundation for International Development, a Toronto nonprofit that aims to promote social change. It focuses on empowering women and young people as emerging business leaders through initiatives in global entrepreneurship and economic development.

She also founded the Friends of Africa, a coalition uniting African communities, businesses, and organizations with their counterparts worldwide to foster intercultural understanding and economic prosperity. FoA sponsors an annual summit, other conferences and networking events, and programs that stimulate sustainable development.

As an advisor with the nonprofit African Expert Network, a Washington, D.C.-based group of global financial professionals, Oyelade provides potential investors with insights into Africa's investment opportunities.

Oyelade is a prolific writer and speaker on topics ranging from social investment and economic change in Africa to the unique challenges faced by women in business and the path to overcoming them. Her 2017 book, *Advancing Beyond the Ceiling: The Gender Barrier Effect on Women's Advancement in Fortune 500* earned critical acclaim.

Among her awards and honors, she was recognized by the Canadian organization Women of Influence+, which inducted her into its Global Leaders Forum in 2019.

Prior to founding InVcap, Oleyade held a variety of senior executive positions. She served as managing partner with the Canadian investment firm First Fund Group Capital; as executive vice president of operations for Casa Consult Limited, a Canadian company promoting environmentally sustainable design; and as group treasurer for Nigeria's Intercontinental Bank PLC, where she managed a fund portfolio of \$8 billion.

Oleyade earned a Doctor of Management from the University of Maryland Global Campus and an MBA in finance and marketing from Obafemi Awolowo University in Nigeria. She is a graduate of the Wharton School's advanced management program, the International Institute for Management Development's business marketing program in Switzerland, and Lagos Business School's senior management program.

# DEGREES IN COURSE

## College of Engineering

### *Master of Science in Information Systems*

Kenneth Tochukwu Abara	Shaiz Akhtar Mohammad
Abdulafeez Oluwadamilare Abobarin	Faisal Anwar Mohammed
Felix Delali Yao Adigbli	Devadharshini Nagarajan
Gulinigeer Aihemaiti	Dheeraj Nandyala
Srinivasa Reddy Akumalla	Rajan Nareshbhai Panchal

Alexander L. Thorndike  
James R. Turner  
Mark L. Vachon  
Laurie B. Werner  
E. Leo Whitworth  
Donald K. Williams Jr.  
Donald L. Williams  
Akira Yamamura  
Richard R. Yuse

This program is for ceremonial purposes only and is not to be considered an official confirmation of degree information. It contains only those details available at the publication deadline. Please note that not all graduates' names are listed, as some students opt out of having their names appear in Northeastern publications.
