A University Engaged With the World

The History of Northeastern

Founded in 1898, Northeastern is a global research university and the recognized leader in experiential learning. Despite the university's current preeminence, Northeastern had modest origins.

At the end of the 19th century, immigrants and first-generation Americans constituted more than half of Boston's population. Chief among the city's institutions committed to helping these people improve their lives was the Boston YMCA. The YMCA became a place where young men gathered to hear lectures on literature, history, music, and other subjects considered essential to intellectual growth.

In response to the enthusiastic demand for these lectures, the directors of the YMCA organized the "Evening Institute for Young Men" in May 1896. Frank Palmer Speare, a well-known teacher and high-school principal with considerable experience in public schools, was hired as the institute's director. Two years later, under Speare's direction, the YMCA advertised the creation of the "Department of Law of the Boston YMCA," and on October 3, 1898, Robert Gray Dodge taught the first class. The program, an immediate success, marked the birth of Northeastern University. Speare would later remark, "We started with an eraser and two sticks of chalk."

When demand for other courses grew, Speare moved to add more programs, and in 1909 the full-time day colleges began instruction. That same year, the Evening Polytechnic School announced "cooperative engineering courses," in which students would have an opportunity to apply classroom knowledge in the workplace—the beginning of Northeastern's signature cooperative education program.

Decades of expansion

The school continued to grow, and in 1922 the College of Business was founded. More space was needed. The university purchased the former home of the Boston Red Sox in 1929, and in 1934 the Boston architectural firm Shepley, Bulfinch, Richardson, and Abbott was awarded the contract to design Richards Hall. Using what was to become the campus signature—white brick—Shepley, Bulfinch presented plans for a neoclassical building. Opened in 1938, Richards Hall was the first building to appear on the front quadrangle.

As the campus grew, so did Northeastern's programs. In 1935, the College of Liberal Arts was added, signaling that Northeastern was on its way to becoming a major university.

When Speare stepped down as president in 1940, he was replaced by Carl Stephens Ell, dean of the College of Engineering. It was under Ell's leadership that Northeastern first admitted women to full-time day programs.

In the postwar world, Northeastern, like its peer institutions, saw a phenomenal increase in the number of people attending college. The university expanded its programs to accommodate this growing population of increasingly diverse students. In rapid succession, additional programs and colleges were established: College of Education, 1953; University College, 1960; College of Pharmacy, 1962; College of Nursing, 1964; Boston Bouvé College, 1964; College of Criminal Justice, 1967; and College of Computer Science, 1982.

This expansion of programs brought with it a need for more buildings—and land. When Ell retired as president in 1959, he was succeeded by Asa S. Knowles. Under his leadership, suburban properties in Weston, Nahant, and Burlington were acquired and the Boston campus blossomed with new buildings, including various undergraduate dormitories designed to accommodate the increasing number of residential students at what had been primarily a commuter campus.

Transforming the Boston campus

When Knowles retired in 1975, he was succeeded by Kenneth G. Ryder, who had begun his career at Northeastern as a member of the history department and had risen through the ranks to become executive vice president before his election as president. Under his leadership, the university expanded and enriched its programs, particularly in the arts and humanities, and continued to improve its facilities. Plans for the Snell Library were finalized during Ryder's tenure, and the campus was beautified. During these years, Northeastern also deepened its commitment to Boston and its neighborhoods.

In 1989, Ryder stepped down as the fourth president of the university. He was succeeded by John A. Curry, Northeastern's executive vice president and its first alumnus to become president. With President Curry in charge, the university embarked on a series of ambitious undertakings, including a new science and engineering research center, a state-of-the-art classroom building, a recreation complex, and several new graduate and undergraduate programs.

To support these new ventures, Curry led Northeastern in a successful fundraising campaign. His years of leadership also featured significant restructuring as the university prepared to enter its second century. In June 1996, after four decades of service, Curry retired from Northeastern. To succeed him, the trustees elected Richard M. Freeland as the university's sixth president.

Elevating experience

A distinguished historian and administrator, President Freeland brought to the university a renewed sense of energy and mission. His programs were designed to support his vision of Northeastern as a university that would be student-centered, practice-oriented, and urban. Northeastern developed the West Campus with architecturally acclaimed residence halls and teaching facilities for the health sciences and computer science, and added new spaces to enrich student life on campus.

When Freeland stepped down in 2006, he was succeeded by Joseph E. Aoun, an internationally known linguistics scholar. Northeastern's seventh president came from the University of Southern California, where he served as dean of the College of Letters, Arts, and Sciences. President Aoun developed an academic plan outlining the university's vision in several areas: experiential learning, global outreach, use-inspired research, urban engagement, and intellectual life. He greatly expanded global co-op opportunities. He also aligned the university's research with three worldwide imperatives—health, security, and sustainability—with a focus on interdisciplinary solutions.

A rising global profile

Under Aoun's leadership, Northeastern launched a system of campuses designed to be platforms for lifelong learning aligned with area economies. The first two opened in Charlotte, North Carolina (2011), and Seattle (2013). Three more campuses followed in San Francisco and San Jose, California (2015), and in Toronto (2016).

In 2016, Aoun led the development of a new academic plan, Northeastern 2025. The plan was a blueprint for transforming the university into a global university system—featuring networks of learners and innovators—designed to empower people to succeed in this era of unprecedented technological change. Accordingly, the university expanded the role of its global campuses to serve as platforms for learning, research, and industry partnerships. In 2019, it opened another location in Vancouver and acquired New College of the Humanities in London, now officially Northeastern University London and offering undergraduates a unique opportunity to earn a dual U.S./U.K. degree. Later in 2019, Northeastern launched a research campus in Arlington, Virginia, an addition to two existing research campuses in Nahant and Burlington, Massachusetts (formed in 1967 and 2012 respectively).

Then in January 2020, technology entrepreneur David Roux and his wife, Barbara, made an investment in the university to open the Roux Institute in Portland, Maine. The institute focuses on graduate studies and research in fields such as AI, digital engineering, and advanced life sciences, amplified by industry partnerships. It was specifically designed to be a model of how higher education can ignite economic development in regions of the country largely bypassed by the innovation economy, setting a new bar for what the global university system could achieve.

Resilience and momentum

The same revolutionary vision for global learning and discovery that inspired Northeastern 2025 infuses the university's latest academic plan, Experience Unleashed. The plan is designed to deepen the impact of Northeastern's global network by maximizing the power of experience to understand and solve the world's interconnected, ever-evolving challenges.

In 2022, the university took a significant step in realizing the potential for its global system by merging with Mills College in Oakland, California, becoming the first university with comprehensive residential campuses for undergraduate and graduate students on both U.S. coasts. Northeastern's Oakland campus is now home to Mills College at Northeastern and the Mills Institute, focused on equity, social justice, and women's leadership. Later in 2022, Northeastern announced its newest campus in Miami, with graduate education and innovation partnerships aligned with South Florida's economic growth.

Thanks to the dedication and hard work of our university community, Frank Palmer Spear's "eraser and two sticks of chalk" have evolved into one of the world's most innovative universities and a platform for significant impact. Our faculty collaborates more fluidly with experts across industry, government, and community-based organizations. Ideas and solutions can be scaled. And our students are empowered to be true global citizens, scientists, entrepreneurs, and creators—prepared to make an impact wherever they go.

HISTORY OF THE BOUVÉ COLLEGE OF HEALTH SCIENCES

The history of the Bouvé College of Health Sciences stems from humble yet impactful beginnings. Although seven women were present at the founding of the Boston School of Physical Education, responsibility and authority quickly fell to three: Marjorie Bouvé, Marguerite Sanderson, and Mary Florence Stratton, and they ran their school with firmly held beliefs.

In 1925, Marjorie Bouvé was already a seasoned teacher and a savvy businesswoman. In just the few months between February and September, she raised funding for a new school, recruited teachers and students, leased facilities, and opened the doors of the Bouvé School. The school was run on a nearly identical footing to that of the Boston School of Physical Education, with curriculum, standards, and culture running in parallel. Nonetheless, the school was an immediate success and in its five years of existence the school graduated dozens of well-trained and well-respected new teachers.

In 1964, Bouvé-Boston School became Boston-Bouvé College at Northeastern University and was incorporated into the university as one of the basic colleges. Entering freshmen elected Bouvé as their college and proceeded at once into their chosen field of study, following the precepts laid down decades before. Things changed, certainly. Bouvé was now coeducational and operated on the five-year cooperative education plan used by all other Northeastern colleges. There were also new facilities, including a spacious outdoor center for a new recreation education program.

In 1980, the college merged with Northeastern's College of Education to form the Boston-Bouvé College of Human Development Professions. In 1992, the school merged with the College of Pharmacy and Allied Health Professions and continues at Northeastern as the Bouvé College of Health Sciences. The vision of Bouvé's founders has moved into the next century.

The Bouvé College of Health Sciences has become a destination of choice for talented students seeking degrees in a variety of health professions. It offers cutting-edge undergraduate and graduate programs in three schools—health sciences professions, nursing, and pharmacy, with an interdisciplinary emphasis that reflects today's team approach to healthcare.

AWARDS

School of Nursing

Nurse Anesthesia Program Leadership Award: Zachary Hanks Dyer

Nurse Anesthesia Program Academic Excellence Award: Kristina Mary McCann

Janet Alice Dewan Clinical Excellence Award: Kelsey Marie Goodman

Nurse Anesthesia Program Faculty Excellence Award: Hailee Nicole Ritcey

Nurse Anesthesia Program Scholarly Project Award: Maria Gentile McCarthy

The Agatha Hodgins Award for Outstanding Accomplishment: Emma Kaitlyn Piwowarski

School of Pharmacy and Pharmaceutical Sciences

American Institute of the History of Pharmacy: Colette Biro

APhA-ASP Senior recognition Award: Kalina Korzec

Claude R. Young Book Award: Sakura Gandolfo

Gary & Ophelia Frazier Scholarship: Colette Biro & Seungeong Yang

Jacob Wasserman Scholarship: Morgan Loh

Massachusetts Pharmacists Association Foundation Award: Christy Ilia

O. James Inashima Scholarship: Shania Lee

Pharmacy Alumni Club Scholarship Award (Pete Millin Scholarship): Karli Kaye

Pharmacy Diversity Leadership Scholarship: Amanda Amoh

Sam and Anna Maddali Pharmacy Scholarship: Kelly Hong

The Lo N. Mok and Eva Mok Chau Community Pharmacy Scholarship: Charlene Guo

William A. Gouveia Scholarship for Student Excellence:

Courtney Fu & Christy Ilia & Chuman Xie

Wolters Kluwer Communication Award: Kalina Korzec

AWARDS continued
